PERFORMANCE REVIEW

As mentioned in the last year's Directors report there has been steady demand recovery in textile business from second half of FY 2012-13, both in international as well as domestic market. Accordingly, the year under review witnessed overall improvement in performance of your company, with sales, operating margin and cash profit reporting substantial increase. Exports of the Company showed handsome increase of 66% over previous year to Rs. 179 crores, significant part of which came from outsourced yarn business. Amongst various importing countries, demand from China was main factor leading to export led growth of the industry. However, of late, exports

to China have been showing a declining trend for various reasons including uncertainty over cotton stocking policies of that country, which has direct impact on our export prices.

Total income during the year was substantially higher at Rs. 285.31 crores as against Rs. 208.06 crores of the previous year. While Operating profit increased to Rs. 22.94 crores from Rs. 12.02 crores, cash profit stood at Rs. 10.03 crores as compared to Rs. 1.30 crores. After charging depreciation of Rs. 6.11 crores, the profit before tax was at Rs. 3.92 crores as against a loss of Rs. 4.98 crores in previous year. After provision for deferred Tax of Rs. 1.97 crores, the Net profit was at Rs. 1.95 crores in comparison to previous year's Net Loss of Rs. 3.56 crores.

As mentioned earlier, there are signs of slowdown in exports, besides pressure on domestic prices. Other areas of concern are continued high cost of salaries and wages as compared to Industry norms and ever rising cost of power in Kerala. Under the circumstances, your company will have to strive hard to maintain the current level of performance during current financial year.

DIRECTORS' RESPONSIBILITY STATEMENT

Pursuant to the requirement of Section 217(2AA) of the Companies Act, 1956, your Directors confirm that:-

- (a) in the preparation of the annual accounts, the applicable accounting standards have been followed and that there are no material departures;
- (b) appropriate accounting policies have been selected and applied them consistently and have made judgments and estimates that are reasonable and prudent so as to give a true and fair view of the state of affairs of your Company at the end of the financial year and of the profit of the Company for that period;

MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE & DEVELOPMENTS

The importance of textile industry in the national economy is overwhelming because of its contribution to economic growth, exports and employment. Exports of Textiles and Clothing during 2013-14 are estimated at around 37.47 billion USD, which works out to a share of about 12 per cent in the estimated total exports of 313.54 billion USD. This sector currently employs about 35 million workers directly and 47 million workers in allied sectors like Agriculture.

The Indian Textile Industry had faced a challenging year in 2011-12 because of economic crisis in Eurozone and the weak recovery in US, resulting in demand recession. Its working, however, improved in 2012-13 and 2013-14 on account of steady prices of raw material and better demand, both in international and domestic markets.

Spinning and Weaving Capacities

Figures of world's installed spinning and weaving capacities are available from International Textile Manufacturers Federation (ITMF) as of May, 2014. As at the end of 2013, world's total spindleage was 257 million, with China having 121 million spindles, representing the share of 47 per cent and India was having 48 million spindles, representing share of about 18.7 per cent. As of March, 2014, however, India's installed spindles have increased to 49.44 million, accounting for almost 19.25 per cent of the global spindleage. It is pertinent to mention that during the last four years, the spindleage in India has expanded by around 8 million. The capacity utilization of spinning of Indian textile mills has substantially increased to 90 per cent in 2013-14 as compared to 88 per cent in 2012-13.

Deducting 10 million spindles of closed mills, the number of operative spindles works out to around 40 million. The number of installed open-end rotors has marginally increased from 795 thousand in March, 2013 to 820 thousand in March, 2014. It is pertinent to point out that expansion of spinning capacity has been significant both in the organized and small spinning sectors. To meet the rising domestic demand for cotton yarn from the downstream value chain and also to meet higher targets of exports of cotton yarn and other cotton textile items, the Twelfth Five Year Plan has envisaged investment of Rs. 40,000 crores in the spinning sector.

A major chunk of spinning capacity expansion took place under the TUF Scheme, which was operative for a span of eight years from 1st April, 1999 to 31st March, 2007. Further, under the modified TUF Scheme operative from 1st April, 2007, investments during three years 2007-08 to 2009-10, increased considerably towards modernization and expansion.

The Restructured TUF Scheme was announced by the Ministry of Textiles on 28th April, 2011. The Scheme was operative from 28th April, 2011 to 31st March, 2012, the terminal year of the Eleventh Five Year Plan. The major change in the Restructured Scheme was a reduction in the repayment period to seven years with two years moratorium as compared to earlier repayment period of ten years with two years moratorium. It is commendable that Government has decided to continue TUF Scheme during the Twelfth Plan period, 2012-17.

The total subsidy outflow to stand alone spinning sector will be kept at 26 per cent of the plan allocation (i. e., Rs. 11,952.80 crore) including commitment liabilities of spinning sector of erstwhile / modified TUFs, RTUFs and fresh sanctions in the 12th Plan period.

The number of looms in the mill sector which remained stagnant at 71,000 for the three-year period, 2007-08 to 2009-10, declined to 66,000 during 2011-12 and 2012-13. It further declined to 52,000 in 2013-14. However, the weaving capacity in the powerloom sector has increased from 22.46 lakhs looms in 2009-10 to almost 23.68 lakhs looms as of February, 2014.

Production of Yarn

The total production of spun yarn which was 4193 million kgs in 2009-10 expanded to 4713 million kgs in 2010-11, showing a creditable growth of over 12 per cent. However, total production of spun yarn in 2011-12 was lower at 4373 million kgs exhibiting a decline of 7 per cent. For the year 2012-13, total production of spun yarn was placed at 4867 million kgs showing a robust growth of 11 per cent. The total Spun yarn production in 2013-14 is projected at 5295 million kgs. Similarly, production of cotton yarn also escalated from 2009-10 to 2010-11. Production of cotton yarn in 2012-13 was placed at 3583 million kgs and for 2013-14 it is projected at 3923 million kgs. This shows a growth of 9 per cent both in respect of spun and cotton yarn in 2013-14 as compared to the previous year.

Exports of Cotton Yarn

In pursuance of National Fibre Policy, Government set up in September 2010, Cotton Yarn Advisory Board (CYAB) to advise the Government on matters pertaining to production, consumption and exports of cotton yarn.

Exports of cotton yarn in 2013-14 are estimated at 1350 million kgs valued at 4.7 billion USD as against exports of 1108 million kgs valued at 3.54 billion USD in 2012-13. This shows a growth of 22 per cent in terms of quantity and 33 per cent in terms of value.

China has been increasing its sourcing of cotton yarn from all over the world in view of the high value cotton stock held by it and to meet ever increasing demand for yarn for its domestic knitting and weaving industry. Import of cotton yarn in China increased by 69 per cent from all sources - 1526 million kgs in 2012 against 903 million kgs in 2011. As against this, import of cotton yarn from India in the year 2012 increased by 124 per cent. India's exports of cotton yarn in 2012 were 326 million

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

kgs as against 111 million kgs in 2011. The share of India's exports of cotton yarn to China accounts for almost 33 per cent of India's total exports of cotton yarn. Thus, India has emerged as the leading exporter of cotton yarn to China. However, our exports of cotton yarn to China in the current fiscal are likely to suffer due to changes brought by the Chinese Government in its cotton pricing policy.

Exports of cotton yarn are permitted freely subject to registration of contracts with DGFT. In the year 2013-14, export contracts registered with DGFT were 1415 million kgs, whereas actual exports at 1350 million kgs, is the highest so far.

Domestic Cotton Scenario

For the cotton season 2012-13, Cotton Advisory Board had estimated area under cotton at 119.78 lakhs hectares and crop at 365 lakh bales. The per hectare yield for the season increased to 518 kgs as against of 496 kgs in the previous season. For the cotton season 2013-14, Cotton Advisory Board has estimated the area at 117.27 lakhs hectares and a crop of 390 lakhs bales. Per hectare yield in the cotton season 2013 -14 works out higher at 565 kgs.

Global Organic Cotton

Global organic cotton production in 2011 declined from 1,95,797 Metric tones to 1,03,004 metric tones in 2011-12, organic cotton saw a fall of about 47 per cent. The top ten organic cotton producing countries in order by rank are: India, Turkey, Syria, China, USA, Uganda, Tanzania, Peru, Egypt and Burkina Faso. India took over Turkey's long-time standing as the number one producer in 2007-08. More than 70 per cent of the world's organic cotton is grown in India. Over the past 6 years, India has been the global leader in organic cotton production. Recently production of organic cotton is coming down as the global brands shift to Better Cotton Initiative (BCI), a market driven green alternative to conventional cotton growing using chemicals. BCI is growing rapidly getting premium over conventional cotton.

Better Cotton Initiative

A sustainable environmental friendly approach of Better Cotton Initiative (BCI) is growing rapidly. BCI brings together Farmers, Ginners, Traders, Spinners, Garmenters, Retailers and Brands in a unique global community committed to develop better cotton as a sustainable main stream commodity. Today almost 900,000 Farmers from 17 countries are participating in BCI programs, including India.

Prospects of Cotton Crop in the Coming Season

Government's prediction of a weak monsoon, which is already delayed for the coming season, has been causing anxiety in the industry about uncertainty of the size of cotton crop. Encouraging factors are: growing awareness among farmers for adoption of better technology and use of augmented supply of a good quality seed. So far in the current cotton crop year 2014-15 sowing is far behind, but it is expected that even if with late rainfall, the area under cotton in all probability will be almost similar to previous season. Therefore, even though the crop is nearly a month late but due to higher productivity, we will have satisfactory and adequate crop.

Global Cotton Production

According to ICAC, for the cotton season 2012-13, global production was estimated at 26.68 million tons. Consumption, on the other hand, was 23.29 million tons. The ending stocks are expected to rise to 17.80 million tons, as against 15.27 million tons in 2011-12.

ICAC's forecast for global cotton production for the cotton season 2013-14 is lower at 25.63 million tons and consumption is forecast at 23.48 million tons. Ending stocks are estimated at 19.94 million tons. Thus Cotlook 'A' Index for the cotton season 2011-12 which was 100 cents per pound declined to 88 cents per pound in 2012-13. However, for the cotton season 2013-14 the price forecast is 91 cents per pound. For the cotton season 2014-15, ICAC has forecast cotton production lower at 25.26 million tons and consumption at 24.35 million tons with ending stocks at 20.89 million tons. The price forecast for Cotlook 2014-15 A index is lower at 75.90 cents per lb. This indicates comfortable supply of cotton in international markets.

The above price forecasts are based on the assumption that the Chinese Government will continue its current reserve policy. As it is, China has built up a massive national cotton reserve, ensuring raw material security to its textile industry. China holding 59 per cent of global cotton stocks, is creating significant uncertainty for the global cotton market. With reduced imports of cotton by China, its share in the global cotton stocks is set to decline.

BUSINESS OVERVIEW

The company is engaged in the business of manufacture and export of cotton yarn. The yarn is manufactured from the world's best sources of raw cotton like the Egyptian Giza, American Supima, DCH 32, MCU-5, setting high standards of quality and excellence at all levels of production. The company manufactures yarns of various counts ranging from NE 40s to NE 240s. Permutations and combinations in spinning, finishing processes result in yarns of varied qualities for specific end users. The extensive range of products on company's portfolio is a testimonial to a continuous process of innovation

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

and expansion in manufacturing technology. The company was amongst the first in India to manufacture compact yarn using the breakthrough technology of compact spinning, and also uses state-of-art machineries across its plants. Presently, the company has a capacity of 58,864 spindles at Aluva, Kerala, consisting of 34,896 compact spinning and 23,968 ring spinning. The company has promoted Patspin India Limited which has 2 Plants at Palakkad in Kerala and Ponneri in Tamil Nadu having a capacity of 113,856 spindles, consisting of 79,025 Compact Spinning and 34,831 Ring Spinning.

Your company's performance improved during F.Y. 2013-14 in line with over all improvement in working of textile mills, mainly on account of robust demand for cotton yarn from China as well as spurt in domestic demand. There is however anxiety in the industry that exports to China may come down due to a change in the cotton policy of China, which was the largest importer of cotton yarn in 2013-14. Further, the power situation which was critical in Kerala in past few years is showing signs of improvement. However, power tariffs are expected to rise soon during the current fiscal. To overcome the problem of shortage of skilled and trained manpower and its increasing cost, it is gratifying that Confederation of Indian Textile Industry (CITI) has already initiated the work for establishment of Textile Sector Skill Council.

OUTLOOK, OPPORTUNITIES AND THREATS

(a) Global exports of textiles and clothing in 2012 were 708 billion USD, as per WTO figures. China's share in the global trade in textiles / clothing was 35 per cent and that of India a barely 5 per cent. With the rising costs in China and its deliberate shift in favour of domestic consumption, India has tremendous scope for boosting its share to a more respectable figure. Further, by 2022, world exports of textiles / clothing are projected to increase to 1,200 billion USD. The expectation is that India's exports would rise from 37.47 billion USD to 120 billion USD by 2022. This will provide immense potential to India for enhancing its exports.

On the domestic front also India is poised for a healthy growth, in view of rising population, sustained increase in per capita income and disposable surplus, favourable demographic profile and changing lifestyle. Surveys carried out by Textiles Committee also corroborate this. Besides, Government of India is becoming increasingly sensitive to the needs of the textile industry and taking ameliorative measures in regard to debt restructuring scheme, extension of TUFs and TMC in the Twelfth Five Year Plan etc. Happily, new Government has announced that it will get necessary impetus for boosting exports of textiles. This augurs well for higher of textiles from the country. Another area is rapid growth of technical textiles for which Government has been providing encouraging support.

The Ministry of Commerce has been announcing exporter-friendly measures in the Foreign Trade Policy. Favourable policy changes have been made in Focus Product Scheme, Market Product Scheme, Market Linked Focus Product Scheme, Incremental Exports Incentivisation Scheme, Liberalized EPCG Scheme, etc. All these measures will boost exports of textiles and clothing.

Above all, India is in a unique position of having an integrated textile set-up endowed with presence across all the textile value chain from fibres to fashion garments.

All these favourable factors indicate extremely optimistic and positive future for the healthy growth of the Indian textile industry.

(b) The health of textile units is primarily dependent on adequate availability of quality cottons at competitive prices. With the augmented supply of quality seed and larger production of hybrids and Bt. cottons, production of cotton in the coming season 2013-14 is forecast to be comfortable. However, prospects for cotton crop in the season 2014-15 are uncertain on account of delayed and weak monsoon.

(c) Inadequate Duty Drawback rates run counter to the well-accepted Government Policy of not taxing exports. It may be stated that Duty Drawback is not incentive but only refund of indirect taxes suffered by export products. Further, remission of duties suffered by exported products is totally WTO-compliant. One can only hope that Government will revise upward Duty Drawback rates to reflect the actual incidence of duties and taxes borne by exported textile products. Texprocil has been pursuing this matter with Government by providing adequate justification in a logical manner. It is expected that new Government will deal with this problem dispassionately.

RISKS AND CONCERNS

1. Raw Cotton, an agricultural product, is the key raw material used for the manufacture of cotton yarn. Almost 65 per cent of area under cotton cultivation is rain-fed and hence is dependent on vagaries of monsoon, which this year has shown uncertain signs so far. Adequate availability of raw cotton at right prices is crucial for the Company. Any disruption in the supply and/or violent changes in the cost structure would affect the profitability of the Company.
2. The RBI's Monetary Policies are largely dictated towards controlling the inflation. However, of late RBI has been emphasizing the need to control inflation and has therefore kept the interest rates unchanged rates for the last two years.

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

3. Your company follows an efficient inventory management system and a well-crafted strategy of procuring raw materials through a mix of spot and long-term contracts. The company's conscious efforts on maintaining a judicious mix of markets for its sales and thrust on specialty products like Organic, Fair Trade, Better Cotton Initiative (BCI), Supima yarns, Giza yarns have also proved to be beneficial.
4. Volatility in foreign currency exchange rates vis-a-vis Indian Rupee is another area of concern since a sizeable production of cotton yarn is exported by your Company. The Company has in place various Management Information Systems, which enable the management to take decisions on exposures relating to exports, imports, foreign currency loans, etc. The Company continues to strengthen these systems to minimize the risk involved due to adverse movement of exchange rates.
5. Your company has a system of assessing the risks on an ongoing basis. This includes an effective internal control and management reporting system. Further, the framework also captures the existing practices to manage commodity price risk, interest risk, and foreign exchange risk etc. An important aspect of this framework is to promote a balanced approach that considers risk and return.
6. Apart from the intensification of international competition, the areas of concern are poor infrastructure resulting in higher transaction cost, very high power cuts especially in Tamil Nadu and Andhra Pradesh and Government's reluctance to introduce labour reforms. It is hoped that the new Government with substantial majority will be able to push through and implement growth oriented economic policies and introduce the long awaited labour reforms.
7. Another area of concern is Government's periodical announcements for liberalized tariff concessions offered to Least Developed countries like Bangladesh, Nepal, Bhutan and other countries under SAFTA. In fact, Government of India has unilaterally extended tariff concessions to Pakistan by reducing the number of products in the Sensitive List of India for non LDCs under SAFTA. The industry has requested the Ministry of Commerce and Industry that 146 products covered in the Sensitive List may be retained and no such tariff concession be offered to non-LDCs under SAFTA. The industry has also requested that at least a nominal import tariff of 5 per cent may be retained for all products that may be removed from the Sensitive List and specific duty rates, where applicable, may be retained.

Bilateral discussions for the Free Trade Agreement with European Union are progressing well and on conclusion of the Agreement India will have a level playing field to compete with our competitors, especially Pakistan.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has a proper and adequate internal control system to ensue that all assets are safeguarded and protected against loss from unauthorised use or disposition and that all transactions are authorized, recorded and reported correctly.

The internal control is supplemented by an extensive programme of internal audits, review by management and documented policies, guidelines and procedures. The internal control is designed to ensure that financial and other records are reliable for preparing financial statements and other data and for maintaining accountability of assets.

INDEPENDENT AUDITOR'S REPORT
To the Members of GTN TEXTILES LIMITED

Report on the Financial Statements

We have audited the accompanying financial statement of **GTN Textiles Limited** ('the Company') which comprises the Balance sheet as at **31st March, 2014**, the Statement of Profit and Loss and the cash flow statement for the year then ended, and a summary of the significant accounting policy and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting Standards referred to in sub-section (3C) of section 211 of the Companies Act, 1956 read with the General Circular 15/2013 dated 13th September, 2013 of the Ministry of Corporate Affairs in respect of Section 133 of the Companies Act, 2013. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with the ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the Management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2014

1 Summary of significant accounting policies

a. Basis of preparation

The financial statements are prepared to comply with the mandatory Accounting Standards prescribed in the Companies (Accounting Standards) Rules 2006, (as amended) issued by the National Advisory Committee on Accounting Standards and the relevant provisions of the Companies Act, 1956. The financial statements have been prepared under the historical cost convention, on the basis of a going concern and on accrual basis.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule VI to the Companies Act, 1956. Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 (twelve) months for the purpose of current and non current classification of assets and liabilities.

b. Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of financial statements and reported amounts of revenue and expenses of that year. Actual result could differ from these estimates. Any revision to accounting estimates is recognised prospectively.

c. Fixed Assets

(i) Tangible Assets/Intangible Assets are stated at acquisition cost less net of accumulated depreciation. Expenditure during construction period in respect of new project/expansion is allocated to the respective fixed assets on their being ready for commercial use. Fixed assets are eliminated from financial statements either on disposal or when retired from active use. Also refer Policy g and h below. Losses arising from the retirement of, and gains or losses arising from disposal of fixed assets which are carried at cost are recognised in the Statement of Profit and Loss.

(ii) Impairment of Assets : The company assesses at each Balance Sheet date whether there is any indication that any asset (both tangible and intangible) may be impaired, if any such indication exists, the carrying value of such assets is reduced to recoverable amount and the impairment loss is charged to Statement of Profit and Loss. If at the Balance sheet date there is any deduction that a previously assessed impairment loss no longer exists, then such loss is reversed and the asset is restated to that extent.

d. Investments

Long term investments are stated at cost less provision, if any for other than temporary diminution in the value of investments.

e. Inventories

Inventories are stated at lower of cost and net realisable value. Cost of raw material is computed by using "Specific identification" method and for other inventories "Weighted Average" method. The cost includes cost of purchase, cost of conversion and other cost incurred in bringing the inventories to their present location and condition.

f. Revenue Recognition

Sales are recognised as and when risks and rewards of ownership are passed on to the buyer and ultimate realisation of price is reasonably certain.

Export Sales are inclusive of deemed exports while domestic sales are net of Value Added Tax.

g. Borrowing Cost

Borrowing costs attributable to acquisition and construction of qualifying assets are capitalised as a part of the cost of such asset upto the date when such asset is ready for its intended use. All other Borrowing costs are charged to Statement of Profit and Loss.

h. Depreciation

Depreciation has been provided at the rates and in the manner prescribed in Schedule XIV to the Companies Act, 1956.

Plant and equipments have been, on technical assessment, considered as continuous process plants as defined in the said Schedule and depreciation has been provided accordingly.

Depreciation on Plant and equipments is provided on Straight Line Method. In respect of other assets depreciation is provided on Written Down Value Method.

Intangible Assets are amortised at the rate of 16.21% based on their estimated useful lives.

i. Employee Benefits

Short Term employee benefits including accrued liability for Leave Encashment (other than termination benefits) which are payable within 12 (twelve) months after the end of the period in which the employees render service are paid/provided during the year, as per the Rules of the Company.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2014 (Contd.)

Defined Contribution Plans:

Retirement benefits in the form of Provident Fund, Family Pension Funds, Superannuation Fund (wherever opted) and ESIC are defined contribution scheme and the contributions are charged to the Statement of Profit and Loss of the period when the contributions to the respective funds are due. There are no other obligations other than the contribution payable to the respective trusts.

Defined Benefit plans:

The Company provides for Gratuity, a defined benefit retirement plan, covering eligible employees. The scheme is funded with Life Insurance Corporation of India. Liability under Gratuity plan is provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial period.

Termination Benefits:

Payments under Voluntary Retirement Scheme, if any are recognized in the Statement of Profit and Loss of the year in which such payments are effected.

j. Foreign Currency Transactions

Transactions in Foreign Currency are recorded at the rate of exchange in force at the date of transactions.

Foreign Currency assets and liabilities both monetary and non monetary are stated at the rate of exchange prevailing at the year end and resultant gains/losses are recognised in the statement of profit and loss. Premium / Discount in respect of Forward Foreign Exchange contracts are recognised over the life of the contracts.

k. Taxation

Income Tax expenses comprises Current Tax and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year, unabsorbed depreciation or carry forward loss under taxation laws).

Deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted on the Balance Sheet date.

Deferred tax assets are recognised only to the extent that there is reasonable certainty that the assets can be realised in future; however where there is unabsorbed depreciation or carry forward losses, deferred tax assets are recognised only if there is virtual certainty of realisation of such assets. At each balance sheet date the Company re-assesses the deferred tax assets.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Minimum Alternative Tax credit is recognised as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period and is reviewed at each balance sheet date.

l. Provisions and Contingent Liabilities

Provisions: Provisions are recognised when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Contingent Liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made, is termed as a contingent liability.

m. Cash and Cash Equivalents

In the cash flow statement, cash and cash equivalents includes cash in hand, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less.

n. Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.
